## GREEN: Greenhill Moss

Moss walls and moss pictures made of stabilized cushion moss directly from the manufacturer and developer

**What is real Greenhill moss?**

Greenhill moss is exclusively manufactured by the company Freund GmbH from Berlin. Our natural and green walls are made of real, stabilized cushion moss (bun moss), which is mounted on a carrier panel. **Natural. Individual. Maintenance-free.**

**How is the Greenhill moss made?**

The Greenhill Moss is sold worldwide. We always consider the picking-times in order to preserve the homogeneity of the forests. The gathered moss is cleaned, treated, preserved and fixed to carrier material in our manufactory in Germany.

**Where can you buy the real Greenhill moss?**

The real Greenhill moss can be purchased from Freund GmbH and its trading partners only. Freund GmbH is the **manufacturer and seller of Greenhill moss since 2011.**

**What sizes and shapes are available?**

You can order Greenhill from us in any size - small images, complete walls, ellipses, bent surfaces. Also 3D installations, such as letters, movable walls, spheres and dices are available.

**What are the components of the product?**

All pictures and surfaces are manufactured by hand and delivered with moss or aluminium frames and mounting strips on request. The moss is preserved and fixed on the carrier panel (10mm MDF). You get a complete moss surface or form with the total thickness of 5-7 cm.

**How does the frame look like?**

For the moss frames we use preserved wild moss. This is pulled over the MDF edge, so that the edge of the panel is not visible from the side. The aluminium frame is available in 4 different designs:

**How can the moss pictures and moss walls be attached to the wall?**

With our split battens the moss walls and moss pictures can be easily hung up and taken down again. On the back of the carrier panel the strips are already fixed. The split battens are enclosed in the package.

**100% Natural Moss**  
**100% Handmade**  
**MADE IN GERMANY**

**How are the panels packed?**

The panels are wrapped separately, with foil, packed in cardboard boxes. Depending on the size of the order the panels will be sent by parcel service (DHL / DPD) or freight forwarder.

**Should the Greenhill be watered?**

The moss surfaces don't need to be watered or fed as the moss is preserved for a long time. Thus Greenhill does not require watering or maintenance. **Natural. Individual. Maintenance-free.**

**Can I expose the Greenhill moss to direct sunlight?**

The Greenhill is resistant to direct sunlight. An over-exposure to the sun causes a slight fading of colours and the moss becomes harder. This can be solved using our Greenhill repair kit.

**How long does the Greenhill moss last?**

The Greenhill is designed and preserved for a long-term use, bringing a long-lasting fresh green colour. As pioneers on the German market we can proudly say that we have installed the first Greenhill moss walls in 2011 and still look as good as in the first day.

**Recommended humidity?**

The moss needs approximately **40-60% of the indoor humidity** (the normal humidity) in order to maintain its haptic and optical properties.

During the winter season dry air may change these characteristics and hardens the moss. As soon as the indoor humidity increases, the moss gets softer again.

**Does the Greenhill moss attract vermins?**

No. Due to the special and natural preservation the moss doesn't require water and earth. Therefore it neither moulds nor attracts any bugs or flies. Additionally the preservation even has a rejecting effect on vermins. This means you have a double protection against bugs or other vermins.

**Does the Greenhill moss attract house dust?**

No. Due to the special preservation and its causing antistatic effect the "normal" household dust will not stay on a hanging moss picture.

**Why does the moss rub off?**

The Greenhill moss a natural grown round cushion moss. It can fade slightly. The preservation can reduce this effect.

**Are there other colors available?**

Yes. There are up to 4 different colors available. If required, please specify the color, as well as format and quantity in our application form.

The standard color is moss green. Furthermore you can purchase the Greenhill moss in apple green, red and blue.
