POLSTERMOOSWÄNDE UNENDLICH ERWEITERBAR OHNE SICHTBARE ÜBERGÄNGE

Experience has taught us that our Greenhill Premium Moss is a very popular product. However, due to the natural curvature and structure of the moss, rectangular substrates are often a problem with regard to transitions and may not be processed professionally.

This results in visible edges that are not as smooth as the natural of our product. For a long time, we at Freund

Moosmanufaktur have been experimenting with a new base plate which helps us to solve the described edging problem.

As a result we can now offer you our new present product: **GREENHILL PUZZLE**. It consists of a system of four pieces: middle panels, short side panel, long side panel and corner.

THE PUZZLE SYSTEM

With this Freund product, we're providing an additional benefit to our customers and their project.

For **Greenhill Puzzle**, the cushion/bun moss is mounted on 5mm-thick HDF panels. The system comprises **middle pieces**, **side pieces** (in two sizes) and **corner pieces**.

The individual modules can be put together and mounted effortlessly – with no visible edges or intersections.

THE DIMENSIONS

Middle piece:	890 x 556 mm (0,5 m²)
Side piece, long:	853 x 118 mm
Side piece, short:	118 x 523 mm
Corner:	115 x 84 mm

Greenhill Puzzle, colour: moss green – individual pieces

Greenhill Puzzle, colour: moss green – assembled

GREENHILL MOSS PUZZLE

- Sound absorbent
- No intersections: seamless puzzle assembly system
- Fast installation: installation of 10 m² section in approx. 4 hours
- Colour: moss green
- Short delivery timescales: kept in stock so available at short notice
- Carbon neutral piece by piece

PIECE BY PIECE: CARBON NEUTRAL TOGETHER

1 m² rainforest offsets approx. 100 kg CO₂ every year.

Saying 'Save the rainforest!' might be a bit old hat. But rainforests are still the lungs of the earth. And tree cover has been decreasing for three years now.

With our new product, you're working with us to help save the rainforest.

It works like this: in **Wilderness International**, we've found a trusted partner whose goal it is to preserve unique wilderness areas for future generations.

Freund GmbH showroom with Greenhill Puzzle moss wall, size: approx. 10 m²

WILDERNESS
INTERNATIONAL

PROTECT TEMPERATE RAIN FORREST

**TOGETHER WITH WILDERNESS INTERNATIONAL
AND US – PIECE BY PIECE.**

GREENHILL MOOS PUZZLE: BECAUSE NATURE MATTERS

Over an area of 128 m², western Canada's temperate rainforest sequesters around 13 tonnes of CO₂. That's roughly the average annual consumption of one European. This is why retaining this complex ecosystem is so important. As a company, we want to make our contribution.

In Wilderness International, we've found a trusted partner working to preserve unique wilderness areas for future generations.

In 2019, Freund GmbH offset the carbon footprint of its Berlin office, meaning our work in the Goerzwerk Berlin was carbon neutral for the year.

But there's still plenty more to do.
By 2030, we want all of the production
in our manufactory to be carbon neutral.

CARBON NEUTRAL PIECE BY PIECE

JOIN US IN THIS VITAL MISSION!

By purchasing 1 m² of our GREENHILL MOSS PUZZLE, you're joining us in protecting 1 m² of rainforest.

For projects of 10 m² or more, we'll issue you a certificate with the geographic coordinates of the protected area of forest. Please get in touch with us if you'd like further information.

Please see www.wilderness-international.org for more information about the vital work of this Berlin and Dresden-based organisation.

THE ASSEMBLY: SWIFT AND EASY

The interlocking modules enable an effortless installation of the system. Please consult our installation guide for perfect results:

- 1 Always start the installation at the bottom (if needed with the help of a wooden strip) and work your way up, image: Freund GmbH

- 2 Utilise the help of another person during the installation; this allows one person to press the panels firmly against the wall while the other screws them tight. Image: Freund GmbH

- 3 Ideally, the installation is carried out on a carrier panel. Keep an eye out for small gaps in the moss for placing the screws during the installation of our product. Image: Freund GmbH

TOOLS/PREPARATION

- Gloves
- Cordless screwdriver
- Screws (length varies depending on the underlying surface/substructure)
- Yardstick or measuring tape
- Spirit level for correct alignment

If you want a moss wall design that cannot be divided according to the number of modules, it is possible to cut the edges as desired. For this, we recommend using

- Safety glasses
